

## Specification

Traditional slow speed horizontal masticating juicers have a much smaller surface area on the juicing strainer which somewhat restricts the juice extraction process.

Natural Health's NutriPress, a vertical juicer and moving the juicing mechanism to the top of the juice extractor and using a strainer with a larger surface area which results in the juice passing through much quicker after it has been juiced.

Grinding or chopping destroys much of the nutrition in juice. Which juice do you want to drink - JuicePresso maintains nature's taste, fragrance and natural colour and nutrition as it is.

## Benefits

**Grinding or chopping destroys much of the nutrition in juice. Which juice do you want to drink – JuicePresso maintains nature's taste, fragrance and natural colour and nutrition as it is.**

***The New Standard in Juicers - Natural Health's NutriPress***

**Natural Health's NutriPress incorporates new, superior technology and ideas to make a much better juicer so you can easily enjoy super nutritious juice.**

### ✓ Dual Stage Juicing

Juice is extracted through the first crushing stage and before the pulp is ejected, it is then squeezed during the second pressing stage; resulting in more juice, and extremely dry pulp.

### ✓ More Juice

In-house testing found the **Natural Health's NutriPress** yielded 50% more juice than a centrifuge juicer in 50% of the time.

### ✓ Economical

Get the greatest amount of juice from the least amount of fruits. Peels and skins can be also used in various pastries, jams, soups, etc.

### ✓ Better Juice, Healthier Juice

Enjoy more antioxidants, better flavour and superior freshness of your juice. No frothing or foaming, and none of the separation that occurs with other juicers.

### ✓ Self Cleaning

Simply pour water through to self clean the juicer when changing to another fruit, vegetable or leafy green. Save time!

### ✓ Small Footprint

All of the performance of a masticating single auger juicer, but with less space requirements than most centrifuge-style juicers

### ✓ Vegetable Juice

The **Natural Health's NutriPress** juicer excels at making juice out of your favourite leafy greens and wheatgrass.

### ✓ Silence

The **Natural Health's NutriPress** minimises the noise by squeezing slowly rather than grinding at high speed like centrifugal juicers. The 8x harder auger is manufactured out of GE Ultem material.

Natural Health®

# NutriPress SlowJuicer

Natural Health™

# Introduction

Natural Health's NutriPress uses a cold press dual stage juicing process. The juice is extracted through the first crushing stage, then it is squeezed during the pressing stage, resulting in more juice and a very dry pulp. This dual stage juicing process also keeps the nutrients and enzymes alive, giving you a healthier living juice that can be stored for up to 48 hours.

The easy rinse system (ERS), enables you to quickly rinse your machine in between most types of different produce without having to completely stop and disassemble the machine for cleaning. It also reduces your final clean up time and making it easier to have the Natural Health's NutriPress ready for the next time you want to use it.

Natural Health's NutriPress drum assembly is uniquely designed with a Pulp Lever which makes it possible to customise your juices and smoothies for just the right amount of fibre for your taste and for smoothies. The pulp ejection chute is made larger for less clogging of pulp.

### Nature's nutrition

Evenly squeezed ingredients result in the least damage to nutrients.

X brand - Single blade

NutriPress - Dual blade

# Features

Unlike traditional style juicers that operate at high speeds, rip apart the produce and create frictional heat that kills most of the living enzymes and nutrients, the Natural Health's Nutripress operates at a lower speed gently squeezing and pressing the produce. This preserves the natural taste and nutrition of your fruits, vegetables and leafy greens.

*With Natural Health's Nutripress unique auger design, it preserves even more of the natural fresh taste and rich nutrition of your juice by causing as little as possible oxidation to the juice. Its motor rotates at only 43 RPM's. As a result the Natural Health's Nutripress is able to achieve higher juice yield and a much smoother pulp free and foam free juice.*

Cold Press Juicer - Utilizing low speed squeezing system without heat, grinding or centrifugal force.

GE Ultem Material for strainers and dual edge auger (safer - no sharp blades).

Quick and easy to clean.

150W usage up to 10 times lower electricity consumption

After 5 mins

Low noise generation.

BPA FREE

BPA FREE

Juice made with a high-speed juicer

Juice made with a NutriPress Slowjuicer

Yields maximum nutrition, vitamins, antioxidant, taste, colour and juice from any fruit, vegetable or soybean

Rotating speed: 43 RPM

Continuous Extraction System extracts juice for 30 minutes.

Overheating Protection System stops machine when overheated.
